1 One Day Workshops

We have conducted our "starter workshop on hardware, software and humanware" at over 70 independent schools since 1982. We also offer customized workshops on a variety of topics from "plagiarism on the web" to "safety issues" for parents. Check out www.summercore.com/workshops for more info!

"The two of you are wonderfully complementary. Lynne, you are clear, precise, articulate, logical and delightfully funny. Steve, you are a visionary as well as a fabulous teacher. Your talk about copying is one you should always give."
(Anne Lynagh, Math Teacher, Collegiate School, NY)

2 Summercore

Started in 1985, this five day workshop can be conducted at your school. We also offer several "open to everyone sessions" hosted at The Chapin School in New York City. Over 2000 teachers from several hundred schools have attended Summercore. This program is designed for the computer novice, intermediate users of technology, computer teachers, and administrators. Our unique approach builds on the diversity of the participants. Check out www.summercore.com for more info!

" I tell every educator I meet that Summercore was the single most worthwhile computer related course I have ever taken." (George Ellis, Computer Coordinator, St. John the Baptist School, Silver Spring MD)

3 PT with Lynne Schalman

For NYC area schools, we offer a unique opportunity that has proven successful for Boston schools: Lynne Schalman will provide one day per week for the entire school year of on site "personal training" for your faculty. Each school that has taken part in this PT program has seen the personal trainees evolve into the core humanware of the school. Check out www.summercore.com/pt for more info!

"In my twenty-five years of teaching I have found this weekly PT training to be one of – if not the – most valuable and practical style of training I have ever experienced." (Kathleen Neely, Chemistry Teacher, Thayer Academy, MA)

4 Consulting

In business since 1982, we have offered a variety of computer consulting relationships for schools throughout the country. We have expertise in numerous areas, but most importantly, we can help your school with its vision, its mission, and the steps needed towards implementing a coherent computer philosophy. Our sessions with key administrators and trustees have proven useful in implementing the big three of hardware, software, humanware. Check out www.summercore.com/cio for more info!

"We enthusiastically recommend Steve Bergen as a computer consultant for educational institutions. His suggestions helped us formulate a more comprehensive program." (Elaine White, Academic Dean, Gov Dummer Academy, MA)
