

Summercore 2010 in Florida is at St. Mary's Episcopal Day School in Tampa FL cosponsored by Shorecrest Preparatory School in St. Petersburg FL and Academy of The Holy Names in Tampa FL.

July 26-30, 2010

Tampa FL

www.summercore.com

A Unique Five Day
Marathon in Hardware,
Software and
Humanware featuring
Web 2.0

The total cost of Summercore is \$1133, with \$333 the deposit at time of application and the balance of \$800 due by June 1. Go to www.summercore.com to signup or for more info. If you have any questions, e-mail Steve Bergen at sb@summercore.com. Or you can contact Penny Jennings (PJennings@holynamempa.org) or Carol Stefany (Carol.Stefany@smeds.org) or Dawn Weinman (dweinman@shorecrest.org) who are Summercore alums (along with hundreds of other Florida independent school teachers and administrators).

Summercore helped me to realize how important and necessary it is for teachers to integrate technology into their classroom and into their lives. The Summercore experience is an awesome overview of the latest technology. I am now ready to embrace technology instead of hide from it! *Susan Bossard, Independent Day School, Art Teacher, SC 2008*

Understanding that I have attended many professional development programs--this was by far one of the very best. *Donald Morrison, Dean of Faculty and History Teacher, SC 2009*

Mostly transforming. I learned so much and have a different perspective about how educators MUST include it as a tool within their curriculum. It is something my entire faculty needs to participate in. The three of us who attended from Holy Names are giving a presentation at the first faculty meeting, but I still know that it will not even begin to affect them the way the whole (stressful) week did us! *Linda Nutter, High School English Teacher, Academy of Holy Names, SC 2009*

My gosh, I did tell you on Friday? I was overwhelmed on Monday but by Friday I realized I had learned so much and felt more confident about the use of the technology than I had ever felt. Thank you so much for allowing me to grow and teaching me how to continue to learn in this area. *Dottie Smay, Media Specialist, Shorecrest Preparatory School, SC 2009*

Extremely valuable in both getting me over fears about technology and demystifying a number of programs and tools that I had just heard about or seen used (but not used myself). I also loved the week of bracketed time to finally be able to learn a great deal about Web 2.0 tools and to work through tech/computer-related issues with a community of educators. It was all good! *Hugh Schoolman, Middle School Head, Shorecrest Preparatory School, SC 2009*

Remembering that I loved it, I will recommend it to anyone who asks me about it. I also appreciated the conversations on ethics and much-needed clarification on copyright issues, etc. Thank you! *Suzy Maldonado, Lower Division Spanish Teacher, Berkeley Prep School, SC 2009*

Cannot say enough about Summercore. The expertise and benefits that you two shared with us are practical, applicable, and most of all, fun! I think of Summercore as waking up on Christmas morning, with a room full of gifts with my name on them. I am free to open any or all of them, whenever I wish, and they are always going to be there for my use. What an exciting opportunity for us all. *Beth Sawyer, High School Teacher, Academy of Holy Names, SC 2009*

Overall, I feel like I have been motivated to explore. I have picked up many tricks and skills that will save me a lot of time. I also had a ton of fun, and have been inspired by the positive attitudes and willingness to try by many of my fellow educators. *Sarah Moebius, Algebra 1 Teacher, Shorecrest Preparatory School, SC 2008*

Really loved it! Keep everything: curriculum, teaching styles, break times, and the hands-on learning time. Not only did you teach helpful content, you modeled great teaching methods. *Linda Boza, St. Mary's Episcopal School, SMEDS, SC 2008*

Expect the unexpected! I came for a long workshop and it slipped by in hours. My brain was FULL when I left. Coming to Summercore a second time was as exhilarating as the first. *Cheryl Lenz, Out of Door Academy, 5th grade math, 6th grade geography, SC 2008*
